

OPMF49 HANG GLIDER PILOT SUPERVISION AUTHORISATION

INSTRUCTIONS

OPM Rule 5.5.2 allows pilots holding a pilot certificate one grade lower than the site rating to fly at that site while being directly supervised by a current instructor, assistant instructor, or a current Advanced certified pilot who is familiar with the site **and** after pilot and supervisor have completed this form.

Note: If the supervisor is an instructor who has supervised the pilot's previous 3 flights this form is not required.

Instruction of new skills may not be undertaken by anyone but a certified Instructor.

OPMF49 must be completed each day prior to flight and is to be retained by the pilot under supervision.

The use of radio communication between pilot and supervisor is strongly recommended.

A debrief with the pilots Instructor must take place after the flight.

Any failure of the supervised pilot to adhere to the above instructions may result in restrictions being enforced by the instructor or further action by the NZHGPA.

Supervised Pilot to complete
